

BabyCare

Program for Pregnant Women

BabyCare is a program for pregnant women receiving services through FAMIS, FAMIS Plus, FAMIS MOMS or Medicaid and who are not currently enrolled in a Managed Care Organization (MCO). Women enrolled in an MCO should contact their MCO for information on pregnancy programs.

The BabyCare Program includes:

Case Management Services for pregnant women who are at higher risk for problems during pregnancy.

Expanded Services for pregnant women including childbirth and parenting classes, nutrition services, homemaker services for women on bed rest, and substance abuse treatment services.

A pregnant woman may be considered at higher risk if she:

- has high blood pressure, diabetes, asthma, or another medical condition
- is expecting twins or triplets
- had a previous miscarriage or a baby born much earlier than the expected due date
- is a teen or over 35 years old
- uses certain medicines prescribed by a doctor, smokes, drinks alcohol, or uses other drugs
- is in an abusive relationship
- does not have a permanent home
- suffers from depression or other mental health issues
- has not gained enough or gained too much weight during pregnancy
- was underweight or overweight before becoming pregnant
